

No specific relationship between CWP (nonprofit; run by volunteer board); only got one email address for CWP

VA Waters is a business

Overlapping personnel (Andrew Hineman)

- Tried to address with Donnie Poe; hope and expect

Did not get out of the car; on the Avtex portion when saw impact area; mostly took photos and videos and left

Area 2 – lots of stockpiled trees

If pull up the FEMA map; date of 2008 – 100 year flood plain shows where it is located

State is going to issue a NOV for VSMP (VA storm water management program (erosion and sediment)); VA wetland permitting (looped VA marine resources) re: boat ramp (US army corps of engineers)); DEQ issuing NOV for the land clearing

Contact information – Tiffany Severs (DEQ – [tiffany.severs@deq.va.gov](mailto:tiffany.severs@deq.va.gov)); Terry Crockett-Augustine ([Theresita.M.Crockett-Augustine@usace.army.mil](mailto:Theresita.M.Crockett-Augustine@usace.army.mil)) – one of the Norfolk district permitting

Wood turtles; state endangered species; things that should have been done before doing land clearing permit; most counties will require

Sheriff had called CWP

Not looking to enforce; don't know that they have authority to do so, just relaying the information to the state, USACE, EPA, and Warren Co and expecting that "you" will

I referenced July 2022 meeting, and she does have recollection of it; remembered encouraging wetland delineation (Which I also remember) and said remembers saying that they need to comply with all environmental laws (which I remember us essentially collectively saying). I pointedly asked "so does it appear that they were just doing things not what they said in the meeting" and AA gave impression that did not do any of the state permitting and land clearing without analysis etc. She believes the entire area is floodplain based upon FEMA map. Looped in USACE because of boat launch and land clearing.
